Drexel University College of Medicine is recruiting core basic science faculty for our new four year MD program campus location in Wyomissing, Pennsylvania. Planning is well underway in conjunction with our partner Tower Health, including the construction of a state-of-the-art dedicated medical education building. The campus will provide all four years of instruction leading to the MD degree and will enroll its first class of 40 medical students in August 2021.

These full time, 12-month basic science educator positions will serve as thread leader in their discipline and will participate in multiple M1/M2 courses at the Tower Health/Reading campus of Drexel University College of Medicine. DUCOM’s Foundations and Frontiers curriculum prepares students to provide humanistic care to a diverse population as an integral member of a health care team. The 18-month Foundations phase includes multidisciplinary, integrated basic and clinical science courses that utilize a combination of technology enhanced instructional formats to deliver course content as well as in-class team-centered instructional activities that extend and apply knowledge to clinical problems.

Successful applicants must have a terminal degree in their field of expertise or a related discipline, preferably with multi-disciplinary experience. The successful applicant will be able to work as part of a team of educators from basic and clinical science disciplines as part of an innovative and integrated medical education curriculum that includes teaching opportunities in laboratory, small group and large group settings, as well as in facilitating in Case Based Learning. Additionally, the successful candidate is expected to actively engage in professional development, provide service to the Institution and engage in scholarly activity in the field of medical education.

Drexel University College of Medicine, with over 1,040 medical students, has one of the largest enrollments of any private medical school in the nation and receives over 12,000 applications yearly. This new location will allow us to expand our ability to accept students from this talented pool. DUCOM carries forward its tradition as a college of opportunity, embracing an environment of diversity and inclusion. Having recently completed a curriculum renewal process, our innovative curriculum will span both campuses and be led by Drexel faculty who work together across the campuses to deliver educational excellence. Tower Health is a regional, integrated healthcare system that offers leading edge compassionate healthcare to a population of 2.5 million people in southeastern Pennsylvania. Consisting of Reading Hospital in W. Reading, Brandywine Hospital in Coatesville; Chestnut Hill Hospital in Philadelphia; Jennersville Hospital in West Grove; Phoenixville Hospital in Phoenixville; and Pottstown Hospital in Pottstown, Tower Health provides a connected network of 2,000 physicians across 65 locations. Reading, PA, located in Berks County, offers a wonderful quality of life in a small urban setting, yet is only 59 miles from Drexel’s Philadelphia campus and is easily accessible to other major metropolitan east coast cities.

The position will be filled at the rank of Assistant, Associate or Full Professor commensurate with experience and accomplishments in medical teaching.

Duties and Responsibilities: The key responsibilities of this faculty position include:

- Work with an interdisciplinary team of basic science educators and clinical faculty to develop and implement basic science content in an innovative and integrated medical education curriculum;
• Prepare and develop online educational resources in conjunction with other basic science educators;
• Participate in and design different types of active learning sessions including team-based learning;
• Identify, track and support students in academic difficulty within the course/thread;
• Facilitate case-based learning;
• Participate in mentoring and advising activities for medical students;
• Maintain a scholarly focus in education.

**Education and Experience:**

• Terminal degree in one of the above core basic science disciplines;
• At least five years’ experience teaching in a graduate or medical education setting with evidence of effective teaching;
• Demonstrated success in working well with faculty, administrators and students in an educational environment.
• Preference given to those who demonstrate multi-disciplinary basic science expertise
