The Center for the Neurobiology of Stress Resilience and Psychiatric Disorders (NSRPD) at Rosalind Franklin University of Medicine and Science invites applications from outstanding candidates for a tenure-track faculty position at the Assistant Professor level. New members will join a core group of highly successful and collaborative investigators focused on the neurophysiology of stress disorders and resilience within a wider community of neuroscientists at Rosalind Franklin University of Medicine and Science (Center NSRPD faculty). The successful candidate will be expected to complement the current research strengths in areas of behavioral neuroscience, neuroendocrinology, neurophysiology and pain; applicants with research programs related to the areas of motivated behavior, psychiatric-, or stress-related disorders are particularly encouraged to apply. Candidates are expected to develop a vibrant, externally-funded research program and contribute to teaching in the medical and graduate programs, including mentoring of graduate students and post-doctoral fellows. Faculty appointments will be in the medical school in Physiology and Biophysics. Start-up packages and salary are competitive and commensurate with academic credentials and experience.

Rosalind Franklin University is committed to growing the research mission, in part, through the recently built, state-of-the-art research facilities in the Innovation and Research Park. The new facilities house the Brain Science Institute, which includes the Center for the Neurobiology of Stress Resilience and Psychiatric Disorders, the Center for Neurodegenerative Diseases and Therapeutics, and the Center for Brain Function and Repair. Research Centers for Genetic Diseases, Proteomics and Molecular Therapeutics, and Cancer Cell Biology, Immunology, and Infection are also located in the new building. These facilities are designed to promote interaction among scientists across different fields and with biotech firms and industry partners to address clinically-relevant issues and promote translational research. Researchers will have access to RFUMS core facilities as well as the nearby Captain James A. Lovell Federal Health Care Center (VA Medical Center) and Great Lakes Naval Training Center, which are potential sources of collaboration and research opportunities.

Applicants for this position must have a PhD, MD, or equivalent degree with at least 3-4 years of postdoctoral experience and demonstrate a potential for scholarly activities that expand the research activities of the center. To apply for the position, please visit here. Applications should include a curriculum vitae along with a statement of research interests and professional goals and names of at least three references. Review of applications will begin immediately and continue until the position is filled. Refer any questions via email to Dr. Janice Urban (janice.urban@rosalindfranklin.edu) and indicate “NSRPD faculty” in the subject line.

RFUMS is committed to the inclusiveness and diversity of its faculty. We encourage candidates from underrepresented groups, women, Black/African American, Latinx, Native American, Asian/Pacific Islander, LGBTQ, all of which will contribute to the diversity of our faculty and enhance the excellence of our university community and the education of our student body.
