Assistant Professor of Biology (tenure-track)
York College of Pennsylvania

The Department of Biological Sciences at York College of Pennsylvania is seeking an Assistant Professor position to begin August 2022. The appointee will be primarily responsible for teaching human anatomy and physiology to Biology and Nursing majors. The appointee will also have the opportunity to teach upper-level lecture and laboratory courses in their field of interest that complement existing departmental expertise.

As a student-centered institution, York College focuses on teaching, advising, and mentoring of student research. The ideal candidate will be able to conduct research and mentor students in the CURE (curriculum-based undergraduate research experience)-based research series and to mentor student research broadly in their area of expertise. Peer-reviewed publication addressing research questions in the area of expertise is expected. Professional development and service to the College and community is also highly valued.

Requirements: The ideal candidate will have a Ph.D. in Biology or related discipline that will augment existing departmental expertise. Candidates are expected to demonstrate the potential for excellence in teaching and scholarly activity. Previous teaching experience at the undergraduate level is preferred.
