NIH Sponsored Postdoctoral Position
At the Institute for Exercise and Environmental Medicine (IEEM)

Thermal and Vascular Physiology Laboratory

An NIH funded postdoctoral research fellowship is available to study: a) thermoregulatory responses in burn survivors and b) aging and cardiovascular responses to simulated heat wave conditions, under the mentorship of Craig Crandall, Ph.D.

- Applicants should have a doctorate in exercise science, cardiopulmonary physiology, or a closely related discipline.
- Applicant should be a highly motivated researcher with a strong background in human systems/integrative physiology focusing on thermoregulation and/or cardiovascular physiology, a strong publication record, and excellent communication and laboratory skills.
- The fellow will be expected to participate in experimental design; data collection, data analysis and interpretation; and preparation of oral and written scientific reports.
- The documented ability to independently conduct research studies in human thermoregulation and/or cardiovascular physiology is highly desirable.

The IEEM is part of the Texas Health system and is affiliated with The University of Texas Southwestern Medical Center. https://www.texashealth.org/IEEM

- Salary is commensurate with experience according to NIH stipend levels.
- The fellow will be an employee of Texas Health Presbyterian Hospital Dallas and will receive comprehensive fringe benefits including medical, dental, and retirement plan options.
- Start date is immediate.

Please submit a cover letter describing research interests and experience, a curriculum vitae, and the name, address, and phone number of three references.
