T32 Postdoctoral Fellowship in Cardiovascular Sciences
Medical College of Wisconsin

The Cardiovascular Center at the Medical College of Wisconsin in Milwaukee is accepting applications for its T32 Postdoctoral Fellowship in Cardiovascular Sciences. Application deadline for the next cycle is Tuesday, March 1, 2022.

JOB DESCRIPTION: Our T32 postdoctoral training fellowship is designed to launch and sustain successful careers in cardiovascular research. The postdoctoral fellow will:

• Create and follow a personalized training plan
• Be mentored by a team (choose from over 40 faculty mentors)
• Receive training in core competencies

This three-year fellowship, for citizens and U.S. permanent residents holding an MD, PhD, PharmD, or DO, provides a solid foundation for training through the support of a team of mentors giving structured and personalized guidance, training in core competencies, and the use of individualized development plans. Training areas include Atherosclerosis, Thrombosis, & Vascular Biology; Hypertension; Cardiac Biology & Heart Failure; and Precision Cardiovascular Medicine. Since its inception in 2017, the training program has been highly successful with our trainees publishing in high impact journals, receiving job offers, obtaining K and F awards, and building bridges towards independence as cardiovascular investigators. Up to 3 slots are available! Trainees from diverse backgrounds who are under-represented in science and medicine are encouraged to apply! The program is directed by Ivor Benjamin, MD, director of the Cardiovascular Center and professor of medicine; David Gutterman, MD, senior associate director of the Cardiovascular Center and Distinguished Professor of Cardiovascular Sciences; and Mary Sorci-Thomas, MD, associate director of the Cardiovascular Center and professor of medicine.

TO APPLY: Applicants should apply online through MCW Human Resources (MCW: Careers; Staff Positions, Requisition ID: 25187) by clicking the 'Join Our Team' search button. *Per NIH guidelines, the postdoctoral fellow must be a U.S. Citizen or permanent resident.* QUESTIONS? Contact cvc@mcw.edu.

ABOUT THE CVC: The Cardiovascular Center, founded in 1992 at the Medical College of Wisconsin, serves more than 160 members from 26 departments and institutes on the Milwaukee Regional Medical Campus and surrounding community as it fulfills its mission to improve cardiovascular health in southeast Wisconsin and beyond through cutting-edge research, cost-efficient and high-quality healthcare delivery, rigorous training of the next generation of diverse and proficient cardiovascular scientists and physicians, and engaging the community to eliminate disparities in health outcomes. Directed by Ivor Benjamin, MD, over 32,000 square feet of space is dedicated to the center’s laboratories, offices, conference rooms, equipment cores and staff who promote its mission by maintenance of core resources, acquisition and distribution of funds for meritorious cardiovascular research, education of its members, trainees and staff and interaction with the community to understand its needs and alleviate the burden of disease in the heart and blood vessels. In 2020, the Medical College of Wisconsin was ranked in the top 10 of medical schools for funding from the National Heart, Lung, and Blood Institute. For more information, go to www.mcw.edu/Cardiovascular-Center.
