Postdoctoral Position and Graduate Student Research Assistantship Opportunities in Aging Muscle and Immunometabolism at the University of Utah

Opening for a Postdoctoral Fellowship position and a pre-doctoral trainee position at the University of Utah. Highly motivated individuals with experience and knowledge of techniques in molecular and cellular biology, and with expertise in cell culture, animal models or human aging and/or diabetes and exercise research experience are encouraged to apply. Applicants with additional skill sets and knowledge in immunology are also desired. PhD, MD or PhD/MD is required for postdoctoral position while a Master’s degree is highly encouraged for applicants interested in a PhD trainee position. Salary will be commensurate with current NIH NRSA stipend levels. Graduate students will receive a competitive stipend plus tuition benefits.

Salt Lake City is juxtaposed to the Wasatch Mountains, offering unparalleled opportunities for skiing, hiking, fly fishing, biking, camping, and rock climbing. Eight National Parks are within a 5-hour drive from Salt Lake City thereby bringing together opportunities for an excellent work-life balance https://uofuhealth.utah.edu/why-utah.php.
